

SEMESTER 4 • WEEKS 5–8

Monthly Status Update

AccessGuard Health — Healthcare IAM Operations Capstone

Sabitha S Karanavar

September 14 – October 8, 2026

BEFORE THE CAPSTONE

What Is IAM — and Why I Chose It

The concept behind my AccessGuard Health project, and why healthcare IAM is where I want to build my career.

WHAT IS IAM?

Identity & Access Management is how organizations control who can get into which systems — making sure the right people have exactly the access they need, and nothing more.

In one line: the right people, the right access, nothing more.

SEMESTER 4 PROJECT

IN PROGRESS · WEEK 8

AccessGuard Health — Healthcare IAM Operations

Horizon Valley Medical Center (HVMC) — a fictional 30-employee, 10-department hospital used to simulate real Healthcare IAM operations.

Org & RBAC Design

30 employees, 10 departments; full RBAC matrix and group naming.

AD Lab Build

OU structure on Ubuntu + Samba4 AD DC (dc01) in UTM.

Network Security

Firewall, IDS/IPS, wireless; vulnerability & threat assessments.

JML Lifecycle

Onboarding, transfer, termination, MFA support, access review & PowerShell automation.

Cloud Security

Three-tier VPC, bastion + Zero Trust, hardened VM, container & serverless security.

Compliance

HIPAA + framework analysis, governance, audit plan, CIS / NIST mapping.

Why it matters: directly builds the Healthcare IAM Analyst skills my target roles are asking for.

CAPSTONE STATUS

Progress: Week 8 of 12

~**65% complete** — Weeks 1–6 done, Weeks 7–8 (JML lifecycle) in progress

✓ COMPLETED SO FAR

- Week 1 — Scope Definition & First Build Steps
- Week 2 — Security Operations: Network Security
- Week 3 — Domain Controller & Client; Security Operations: Threats & Vulnerability
- Week 4 — Policy & User Accounts; Entra ID Foundation
- Week 5 — Onboarding & Transfer; Cloud Security Foundations
- Week 6 — Termination & MFA Support; Cloud Infrastructure & Compliance
- Wk 7–8 — JML lifecycle: Access Review, Cloud Compliance & PowerShell Automation (in progress)

🕒 STILL TO COMPLETE

- Wk 9 — Contractor auto-expiration, second onboarding/transfer/termination + Conditional Access policies
- Wk 10 — Second access review, updated access matrix & Standard Operating Procedures
- Wk 11–12 — Design-document reconciliation, rubric cross-check & final portfolio publishing

THE PAST FOUR WEEKS

This Month at a Glance

Week 5

Sep 14 – 19

On-Prem Foundations

Week 6

Sep 21 – 26

Azure & IAM Rubrics

Week 7

Sep 28 – Oct 3

**Compliance & Incident
Response**

Week 8

Oct 5 – Ongoing

JML Lifecycle

COMPLETED · WEEKS 5–6

Identity & Cloud Foundations Built

Samba4 Domain Controller & Secure Admin Access

Continued the on-prem Active Directory build on Ubuntu Server, with SSH access hardened between the management client and the domain controller.

Microsoft Entra ID Configured

Stood up the cloud tenant with users and groups, bridging the on-prem lab to Azure-based identity.

IAM Lifecycle Implementation

Onboarding (least privilege + MFA), termination (deprovisioning + ABAC tagging), and SAML federation — all built and evidenced across Weeks 5–6.

Real Azure Network Build-Out

Three-tier VNet, subnet segmentation, three zero-trust NSGs, and Azure Bastion — deployed end-to-end in the live Azure portal, not simulated.

COMPLETED • WEEKS 5–7

Rubric Documentation Sprint

6

Cloud Security 1 — Final Project Submission

All six rubric criteria written and submitted, plus a 16-page step-by-step completion guide for the hands-on build.

5

Compliance 1 — Final Project Submission

All five rubric criteria written and submitted, built directly from the live 12-week project board.

11 rubric criteria fully documented across both final projects

COMPLETED · OCT 1–7

Deep-Dive Submissions & Platform Alignment

Compliance Auditing Basics

Documentation & Reporting

Legal & Ethical Implementation

Cloud Compliance &
Governance Controls

Security Operations &
Incident Response

Infrastructure Security &
Container Protection

Platform Alignment Confirmed

Verified the real lab subscription is Microsoft Azure, not AWS — realigned every Cloud Security 1 document to match, and built a new Azure Configuration Checklist to guide the hands-on evidence capture ahead.

Entra ID — Live Tenant Evidence

First real Azure Portal capture using the new configuration checklist: the Default Directory user roster for the HVMC tenant.

☐	TN Test Nurse - EHR	test-nurse-ehr@s...	Member	No	No	View	

Seven named users provisioned in Microsoft Entra ID — roles matching the on-prem RBAC design, including a dedicated EHR test account.

PENDING

What's Next

Capture Real Azure Evidence

Replace illustrative screenshots in the Governance Controls and Security Operations submissions with real Azure Portal captures, using the new configuration checklist.

Close Two Open Documentation Gaps

Finish the Cloud Security Fundamentals placeholders and Conditional Access licensing note, and complete the IAM Implementation SAML federation detail.

Refresh the VPC Security Blueprint

Update the infographic to match the project's Azure realignment.

Close Out Week 7, Open Week 8

Finalize the access review report and incident-response playbook test, then move cleanly into Week 8.

HOW I LEARN

Learning Toolkit & What's Next

YouTube

Supplemental tutorials & concept walkthroughs.

Schoology

Coursework, assignments & instructor materials.

Monday.com

Tracking weekly tasks against the 12-week capstone plan.

Google Cybersecurity Cert

In progress, alongside coursework.

CERTIFICATIONS & WHAT'S NEXT

- Currently pursuing the Google Cybersecurity Professional Certificate.
- Next certification goal: CompTIA Security+.
- Leaning more heavily on Monday.com next semester — planning tasks ahead to stay on schedule and finish on time.
