Second Access Review — HVMC-AR-2026-Q4-R2

Board: Week 10 — Second Access Review · 10 November 2026

The access review process was re-run on the live tenant with the same rules and compared with the first review (HVMC-AR-2026-Q4, 20 October). The goal: a shorter, cleaner findings list.

Prepared By	Sabitha S Karanavar
Method	collect_review_data.py (read-only Graph + Azure snapshot) → build_review_pack.py → comparison with Q4
Scope	All SG-* memberships, direct app assignments, Entra directory roles, Azure RBAC (incl. Key Vault)
Cost / changes	$0 · read-only, no access was changed

1. Result

	First review (Q4, 20 Oct)	Second review (R2, 10 Nov)
Review lines	94	103
Recommended Keep	93	103
Findings (Remove)	1	0
Lines unchanged	—	77

> **Cleaner findings list:** the one Q4 finding (a disabled test account holding an Azure data role on the ePHI storage) was fixed, and the second review found **no new access to remove**. Every change since Q4 is explained by an approved JML event, change ticket or Key Vault task.

2. What changed since the first review

Account / identity	Access	Change	Explained by
Emergency Access 01 (break glass)	Global Administrator	Added	Break-glass emergency account (HVMC-IAM-CHG-107); quarterly sign-in test due ~28 Jan 2027

Account / identity	Access	Change	Explained by
Emergency Access 02 (break glass)	Global Administrator	Added	Break-glass emergency account (HVMC-IAM-CHG-107); quarterly sign-in test due ~28 Jan 2027
HVMC Help Desk Admin	Authentication Administrator	Added	Help-desk role (Authentication Administrator): least privilege for MFA support (Step 10, IAM-0004); confirm still needed
HVMC Help Desk Admin	Reports Reader	Added	Help-desk role (Reports Reader): least privilege for MFA support (Step 10, IAM-0004); confirm still needed
HVMC Lab Results Sync (application)	SG-Services-KeyVault-SecretsUser	Added	App reads its own secret (Key Vault Task 2/3)
SG-IT-KeyVault-Admin (security group)	Key Vault Administrator on hvmc-accessguard-kv	Added	Key Vault role at vault scope (Key Vault Task 2)
SG-Security-KeyVault-Read (security group)	Key Vault Reader on hvmc-accessguard-kv	Added	Key Vault role at vault scope (Key Vault Task 2)
SG-Services-KeyVault-SecretsUser (security group)	Key Vault Secrets User on hvmc-accessguard-kv	Added	Key Vault role at vault scope (Key Vault Task 2)
Sabitha S Karanavar	Key Vault Secrets Officer on hvmc-accessguard-kv	Added	Subscription owner/administrator
Jason Park	SG-Security-SecurityPortal-Admin	Added	Matches RBAC v2 for department
Ethan Morales	SG-Lab-EHR-Read	Added	Matches RBAC v2 for department
Ethan Morales	SG-Lab-LIS-RW	Added	Matches RBAC v2 for department
Denise Coleman	SG-Security-KeyVault-Read	Added	Key Vault access designed in Key Vault Task 2 (vault scope only)
Kevin O'Brien	SG-IT-KeyVault-Admin	Added	Key Vault access designed in Key Vault Task 2 (vault scope only)
Test Nurse - EHR	HVMC-Nurse-EHR-ReadOnly on hvmcehrstorage	Removed	Removed in Q4 (the only Q4 finding, R07)
Victor Mensah	SG-Reception-EHR-Read	Removed	Leaver JML-206 — deprovisioned 2 Nov
Victor Mensah	SG-Reception-Scheduling-RW	Removed	Leaver JML-206 — deprovisioned 2 Nov
Jason Park	SG-IT-ITAdmin-Admin	Removed	Mover JML-205 — IT groups removed (separation of duties)
Jason Park	SG-IT-Scheduling-Admin	Removed	Mover JML-205 — IT groups removed (separation of duties)

Account / identity	Access	Change	Explained by
Jason Park	SG-IT-VPN-Read	Removed	Mover JML-205 — IT groups removed (separation of duties)

Not a real change: the 11 legacy EHR-Simulated assignments appear with a different role label ("User" instead of "Default access") because the new snapshot reads the app's role name. The assignments are the same.

3. Open points for the next review (HVMC-AR-2027-Q1, January 2027)

- **EHR-Simulated:** 12 direct (legacy) assignments are still kept under the Q4 “manage” decision — decide whether to retire the app.
- Two single-holder admin roles (Authentication Administrator, Reports Reader) — confirm the help-desk account is still needed.
- Break-glass sign-in test due ~28 Jan 2027; Defender for Storage managed identities (see the Q1 preparation notes).

4. Evidence

HVMC-AR-2026-Q4-R2_Review_Pack.xlsx (103 lines with reviewer, flag, recommendation and justification) and the comparison file HVMC-AR-2026-Q4-R2_comparison.json (no tenant identifiers).
