Akhila Chennamaneni

Aspiring Cyber Security Professional
United States

Summary

Enthusiastic learner and knowledge seeker, aspiring to build a career as a Cybersecurity Professional with a strong interest in understanding the field in depth, including its evolving technologies, practices, challenges, and real-world applications. Passionate about continuously learning, exploring new technologies, and developing practical knowledge through everyday challenges and goals. Keen to gain exposure across different technologies and work environments while strengthening problem-solving, analytical, and technical skills. Committed to being an active team member, continuously improving myself, and contributing meaningful value to an organization through dedication, adaptability, and a strong willingness to learn.

Experience

SAKESH SOLUTIONS LLC

Salesforce Consultant

April 2024 - May 2026 (2 years 2 months)

Waste Management – Salesforce Consultant

-Worked with business stakeholders to gather and analyze requirements and translate them into scalable Salesforce solutions aligned with business processes.

-Participated in migration of business data and processes from legacy and on-premise systems to Salesforce, including data mapping, cleansing, validation, and reconciliation.

-Designed and configured Salesforce solutions using custom objects, fields, page layouts, record types, validation rules, Flow automation, approval processes, and other declarative tools.

-Recommended Salesforce best practices and process improvements to enhance system usability, automation, data quality, and overall business efficiency.

-Supported Salesforce data migration activities using Data Loader, Data Import Wizard, and ETL processes to extract, transform, and load data from multiple source systems.

- Designed and implemented Salesforce security models using profiles, permission sets, roles, sharing rules, and field-level security based on business and compliance requirements.
- Coordinated Salesforce deployments across development, QA, UAT, and production environments using change sets and CI/CD processes through Azure DevOps.
- Created reports and dashboards to provide stakeholders with actionable insights into business operations, performance metrics, and Salesforce adoption.
- Conducted functional testing, supported UAT activities, resolved defects, and validated Salesforce enhancements before production deployment.
